

TRAY WITH DIVIDERS

Are you looking for a ESD safe solution for storing and shipping your products, but with a number too low for a tailor made vacuum formed tray?

Maybe, this tray with dividers is a good solution!

- The dividers are free to insert to make cavities in all required dimensions.
- The transparent dissipative APET lid make inspection without opening possible.
- Made out of dissipative E-STAT®, a material specially developed by Eurostat, this tray has good ESD characteristics without containing carbon. If carbon in the packaging is unwanted, we always propose to use E-STAT®.

The standard dimensions 355x255mm and 555x355mm ensures the application in a standard EURO container.
